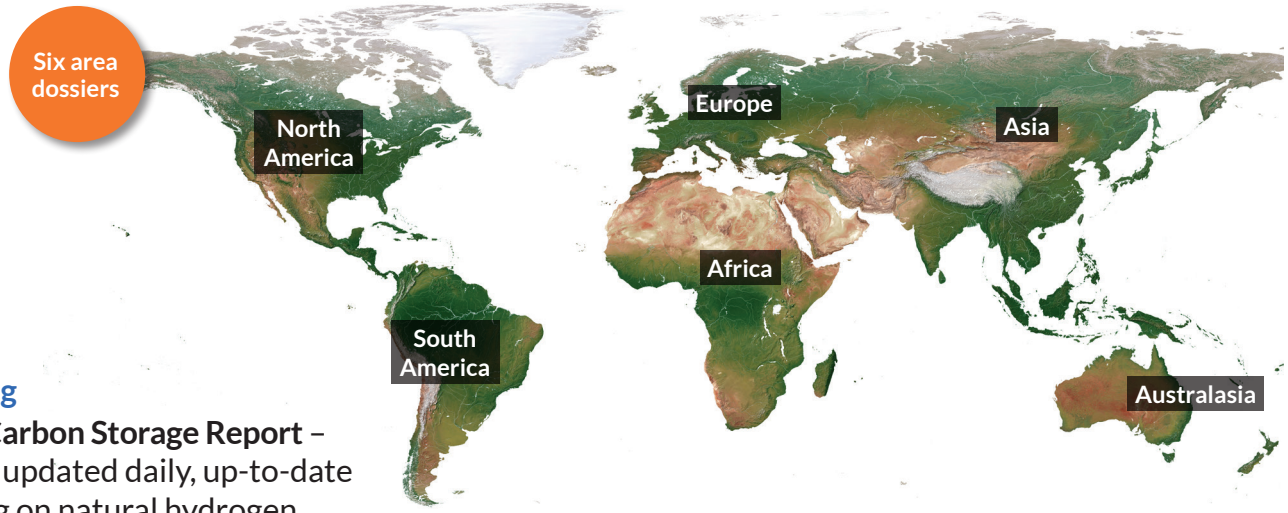
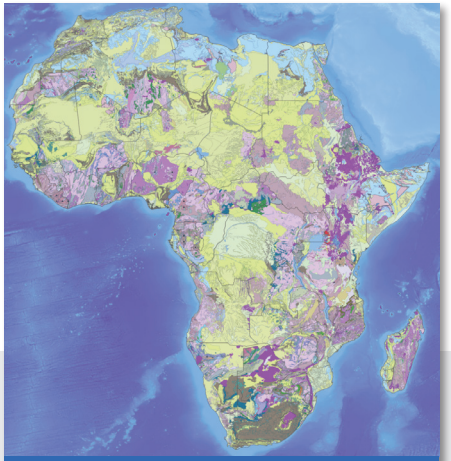
Earthmoves – Natural Hydrogen

Pre-commitment Opportunity

NVentures is seeking industry pre-commitment for a significant new global digital database for natural geological hydrogen exploration and development.





Bespoke 1:1mm scale geology and structure for Africa & South America

Geological Hydrogen, with NVentures scouting

- **Natural Hydrogen & Carbon Storage Report** – A global GIS database updated daily, up-to-date and in-depth reporting on natural hydrogen, helium, and carbon capture and storage.
- **Earthmoves** – Digital geological exploration databases. Developed over twenty years, Earthmoves provides detailed coverage of the geology and exploration potential for major global regions.

Earthmoves – Natural Hydrogen

- **GIS project** (desktop and live online)
- **Natural Hydrogen Report** – review of current developments in exploration and natural H_2 research
- **Area Dossiers** – six continent scale dossiers with in-depth coverage (geology, H_2 play fairway, technical research)

Earthmoves – Natural Hydrogen

Pre-commitment Opportunity

GIS Database

A global ArcGIS project provides a strong focus on the geological context of natural H_2 systems, natural H_2 occurrences and recent & current licencing & drilling:

- Concessions and wells for hydrogen and helium
- Natural H_2 occurrences and shows
- Geology and structure: Ophiolites, BIFs, “fairy circles” etc; potential field data

Natural Hydrogen Report

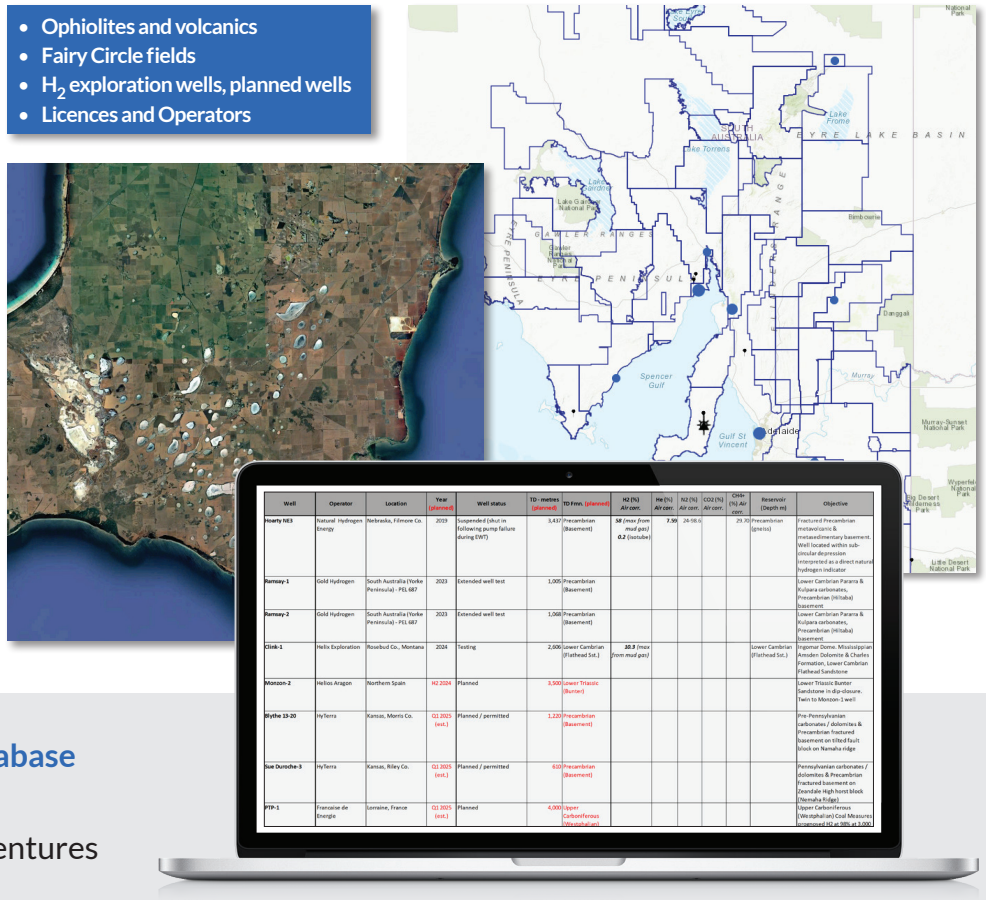
This report covers general issues pertinent to exploration for natural H_2, including the current status of worldwide exploration and academic research on natural hydrogen exploration and hydrogen system models.

Continental Hydrogen Dossiers

A set of six area dossiers with in-depth coverage of natural H_2 geological systems and occurrences, licencing, drilling and other exploration activities:

- Geological context and occurrences, shows and surface indicators
- Bid Rounds, well summaries, concession details
- Technical summaries for all active licences
- Summary of current and planned relevant legislation by country

- Ophiolites and volcanics
- Fairy Circle fields
- H_2 exploration wells, planned wells
- Licences and Operators



NVentures are seeking pre-commitments for the Global Natural Hydrogen Database

- Earthmoves – Natural Hydrogen will be updated quarterly on subscription
- For pre-commitment pricing deals, and development timing please contact NVentures
